Important at a glance

Mobility

Office mobile apps let you view and edit Office documents via browser on a Windows, iOS, or Android device.

Controlled access to documents and emails

With Rights Management Services, you restrict document access to specific people. Other people cannot view or edit documents.

Office on the Web

Create and edit Word, OneNote, PowerPoint and Excel documents in a browser.

² Not available for Windows 10 Enterprise E3 in S mode.

**Email and calendar**

Use business-class email on the familiar Outlook interface, accessible from your desktop or via a web browser. Each user gets a mailbox with 100 GB of storage and can send attachments of up to 150 MB.

A central place for teamwork

Connect your teams with Microsoft Teams, the central place for chat, content, contacts and tools in Office 365. Microsoft Teams makes it easy for you to manage time, assign tasks, and access other business apps and resources.

Automated workflows

Create automated workflows that connect your apps and services. With Microsoft Flow, you can automate notifications, sync files, collect data and more - all without programming.

Digital storytelling - simple and professional

With Sway, you can easily create interactive web-based reports, engaging presentations, newsletters, course materials and more - right on your smartphone, tablet or browser.

File storage and sharing

Unlimited OneDrive storage in virtually any location and on any device. You can easily share your documents with internal and external people and control who can view and/or edit a file.

Video service for business

Create, manage, and share video easily and securely across the enterprise with Microsoft Stream.
